Research & Insights

From our UK Invoice Finance Benchmark Report 2025/6:

- Most businesses have never heard of invoice finance
- After an explanation, **the majority said they would recommend it** to others with cash flow problems
- Significant average pricing swings were found between providers quoting for the same business

This highlights both the awareness gap and the potential benefit from our service for UK businesses.

Real Results for Clients

These are some example case studies:

- Finding a 36% cost saving for a customer on their existing factoring costs
- Finding invoice finance to help a customer complete a business acquisition
- Payroll financing arranged for a new construction staff agency
- Arranging for an expanding business to access factoring despite a poor credit history
- Saving thousands in costs when asked to leave an existing finance provider
- Increasing funding levels for a business with a prime debtor concentration
